

HR Policies and Procedures Manual

Owner: People Operations | Version: 3.0-rag | Effective date: 2026-04-20

Document type	Synthetic policy manual
Use case	RAG training, retrieval benchmarking, QA evaluation
Chunking guidance	Use one chunk per section and preserve section IDs

1. Purpose and Scope

HR Policies and Procedures Manual describes the formal policy requirements and operating procedures used by Northstar Analytics Ltd.. It is written as a synthetic but realistic document for training retrieval, summarization, and question-answering systems.

This document applies to all employees, interns, temporary workers, and approved contractors unless a section explicitly states otherwise.

Managers are responsible for enforcing this policy consistently and for escalating unusual cases to the document owner.

2. Roles and Responsibilities

Employees must read, understand, and follow the policy requirements relevant to their role.

Managers must document exceptions in writing and retain approvals in the designated system of record.

The document owner reviews this policy at least annually and whenever business, legal, or technical requirements materially change.

3. Recruitment

The section on recruitment defines the standard rule, the approval path, and the records that must be retained.

Requests related to recruitment should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for recruitment, the exception must include the reason, the duration, and any compensating controls.

Records related to recruitment must be stored in the designated repository with a clear owner and retention period.

Metrics related to recruitment should be reviewed periodically to identify recurring issues and opportunities for improvement.

4. Onboarding

The section on onboarding defines the standard rule, the approval path, and the records that must be retained.

Requests related to onboarding should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for onboarding, the exception must include the reason, the duration, and any compensating controls.

Records related to onboarding must be stored in the designated repository with a clear owner and retention period.

Metrics related to onboarding should be reviewed periodically to identify recurring issues and opportunities for improvement.

5. Records Management

The section on records management defines the standard rule, the approval path, and the records that must be retained.

Requests related to records management should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for records management, the exception must include the reason, the duration, and any compensating controls.

Records related to records management must be stored in the designated repository with a clear owner and retention period.

Metrics related to records management should be reviewed periodically to identify recurring issues and opportunities for improvement.

6. Training

The section on training defines the standard rule, the approval path, and the records that must be retained.

Requests related to training should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for training, the exception must include the reason, the duration, and any compensating controls.

Records related to training must be stored in the designated repository with a clear owner and retention period.

Metrics related to training should be reviewed periodically to identify recurring issues and opportunities for improvement.

7. Offboarding

The section on offboarding defines the standard rule, the approval path, and the records that must be retained.

Requests related to offboarding should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for offboarding, the exception must include the reason, the duration, and any compensating controls.

Records related to offboarding must be stored in the designated repository with a clear owner and retention period.

Metrics related to offboarding should be reviewed periodically to identify recurring issues and opportunities for improvement.

8. Exceptions and Escalations

Exceptions must be rare, time-bound, and approved by the designated authority named in the relevant section.

All exceptions must be logged with the approver, rationale, expiration date, and any required follow-up actions.
