

Leave and Benefits Policy

Owner: People Operations | Version: 3.0-rag | Effective date: 2026-04-20

Document type	Synthetic policy manual
Use case	RAG training, retrieval benchmarking, QA evaluation
Chunking guidance	Use one chunk per section and preserve section IDs

1. Purpose and Scope

Leave and Benefits Policy describes the formal policy requirements and operating procedures used by Northstar Analytics Ltd.. It is written as a synthetic but realistic document for training retrieval, summarization, and question-answering systems.

This document applies to all employees, interns, temporary workers, and approved contractors unless a section explicitly states otherwise.

Managers are responsible for enforcing this policy consistently and for escalating unusual cases to the document owner.

2. Roles and Responsibilities

Employees must read, understand, and follow the policy requirements relevant to their role.

Managers must document exceptions in writing and retain approvals in the designated system of record.

The document owner reviews this policy at least annually and whenever business, legal, or technical requirements materially change.

3. Annual Leave

The section on annual leave defines the standard rule, the approval path, and the records that must be retained.

Requests related to annual leave should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for annual leave, the exception must include the reason, the duration, and any compensating controls.

Full-time employees accrue 20 working days of annual leave per year, prorated for partial years of service.

Leave requests of more than 10 consecutive working days require manager approval at least 2 weeks in advance.

4. Sick Leave

The section on sick leave defines the standard rule, the approval path, and the records that must be retained.

Requests related to sick leave should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for sick leave, the exception must include the reason, the duration, and any compensating controls.

Employees receive up to 10 paid sick days per calendar year for personal illness, medical appointments, or short-term care needs.

Managers should not request diagnostic details unless required for a lawful accommodation or leave process.

5. Parental Leave

The section on parental leave defines the standard rule, the approval path, and the records that must be retained.

Requests related to parental leave should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for parental leave, the exception must include the reason, the duration, and any compensating controls.

Records related to parental leave must be stored in the designated repository with a clear owner and retention period.

Metrics related to parental leave should be reviewed periodically to identify recurring issues and opportunities for improvement.

6. Public Holidays

The section on public holidays defines the standard rule, the approval path, and the records that must be retained.

Requests related to public holidays should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for public holidays, the exception must include the reason, the duration, and any compensating controls.

Records related to public holidays must be stored in the designated repository with a clear owner and retention period.

Metrics related to public holidays should be reviewed periodically to identify recurring issues and opportunities for improvement.

7. Benefits Administration

The section on benefits administration defines the standard rule, the approval path, and the records that must be retained.

Requests related to benefits administration should be submitted through the official workflow rather than handled informally through chat or email alone.

When a manager grants an exception for benefits administration, the exception must include the reason, the duration, and any compensating controls.

Records related to benefits administration must be stored in the designated repository with a clear owner and retention period.

Metrics related to benefits administration should be reviewed periodically to identify recurring issues and opportunities for improvement.

8. Exceptions and Escalations

Exceptions must be rare, time-bound, and approved by the designated authority named in the relevant section.

All exceptions must be logged with the approver, rationale, expiration date, and any required follow-up actions.
